### **Ashwaubenon High School Supermileage Team Completes Successful Year With Car Show**

**Ashwaubenon, WI – May 29, 2012** – Ashwaubenon High School’s Supermileage Team wrapped up the school year with their annual car show on May 20<sup>th</sup>. This final event culminated a busy year which included mileage competitions in Texas, at Road America and at the Wisconsin International Raceway.

In Houston, Texas, the Supermileage Team competed in the Shell Eco Marathon. The students were able to see designs from other schools around the nation as well as universities throughout North and South America. While there, they received many compliments from event staff and participants on their unique front wheel drive design.

The team brought home two first place trophies and one second place trophy from the Wisconsin competitions. These state-wide competitions were held in Elkhart Lake at Road America and in the Fox Valley at the Wisconsin International Raceway.

The students felt the season was a success and had fun finishing it with their annual car show. All proceeds from the car show go to support the AHS Supermileage Team which is an after school program. The program gives students a chance to work on real world problem solving issues, specifically gas mileage - an issue that affects everyone today.
