Dear Parent(s):

Our school year will soon be off to a great start! As with each school year, we have classes and many programs to benefit our students' learning and skill development. The areas of Literacy and Mathematics continue to be target areas for the Ashwaubenon School District as a whole. As a result of these goals, and based on the success of Intervention/Enrichment (I/E) time at the elementary schools last year, we are now including targeted Literacy and Mathematics time during our guided study periods.

Guided study is currently built into the 7th and 8th grade schedules as an elective. Based upon assessments and teacher observations throughout the year, students will receive targeted Literacy and/or Mathematics interventions to help strengthen these skills if needed. These interventions will only be for part of the guided study period and only last until the student's area of need is addressed.

If your son/daughter was identified for a Literacy/Math focused guided study, it will be called either '**Guided Study/Literacy Target Time**' or '**Guided Study/Math Target Time**' on his/her schedule for the start of the new year. If you have questions, please feel free to contact Kris Hucek. This targeted Literacy and Mathematics time will begin with the beginning of the school year.

Sincerely,

Kris Hucek
Principal
