### **Briggs & Stratton Donates Twelve New Engines To Ashwaubenon High School**

**Ashwaubenon, WI – April 16, 2010** – Briggs and Stratton Corporation has donated twelve new two-stroke engines to Ashwaubenon High School for their Power Technologies courses. This donation will allow Ashwaubenon students have a more realistic and up-to-date experience when working on two-stroke engines.

Power Technologies instructor Jay Olenski, who has been working closely with representatives of Briggs and Stratton, said, “In addition to giving students experience with the latest two-stroke engine technology, these new engines will help reduce the expense of maintaining their older, two-stroke engines because parts were getting expensive and hard to acquire.” The new Briggs and Stratton engines were designed to go on Toro Snow brooms.

The new engines are being prepped for class use and, the curriculum is being modified in order to begin using the new technology as soon as possible. Briggs and Stratton also donated all the supporting materials, such as manuals and CDs, which will further help enhance the Power Technologies program at Ashwaubenon High School.

For more information, please contact Jay Olenski, Ashwaubenon High School Power Technologies Instructor, at (920) 492-2950 extension 5145 or [jolenski@ashwaubenon.k12.wi.us](mailto:jolenski@ashwaubenon.k12.wi.us).
